- Lead paint bags*
- Special waste applications*
- Windy or containment-sensitive sites

BEFORE YOU LOAD

● Match the container to the material.

Different waste streams can require different containers. Tell TrashSavers what you plan to dispose of before delivery.

● Confirm specialty materials first.

Dirt, concrete, washout, contaminated soil, asbestos, lead-paint debris and other regulated materials may require advance approval.

● Plan for safe placement.

Choose a stable, accessible location with enough room for delivery and retrieval of the container.

● Avoid prohibited materials.

Do not place hazardous or restricted materials into a standard dumpster unless TrashSavers has specifically approved the material and container.

SPECIALTY MATERIAL NOTICE

Material acceptance and disposal requirements can vary by project and waste stream. Contact TrashSavers before loading specialty or regulated materials.
